Farm Waste Fashionistas

Three views of a white, textured dress on a mannequin. The dress has a high neckline and a fitted silhouette. The texture is intricate, resembling a complex lace or a dense, raised pattern. The views show the front, side, and back of the garment.

Turning Food Waste into Textiles

Textile designer [Cara Marie Piazza](#) isn't afraid of food stains on her clothes - to the contrary, they're the basis of her work. Taking inspiration from traditional fabric dyes made from food products, Ms. Piazza creates a rainbow of designs on cotton, silk, and bamboo cloth, utilizing onion skins and other food waste otherwise destined for the compost bin. by [Brendan Francis Newnam](#)

Textile dyed with red onion skin and vinegar by Cara Marie Piazza
